## EDUCATION

---

### **MBiol Biology, Wadham College, University of Oxford**

*October 2021 – June 2025*

- Graduated with Upper Second-Class Honours (2:1).
- Research dissertation: 72 (First-Class mark)
- Awarded Wadham College Exhibition Award for academic work.

### **Queen Elizabeth's School, Barnet**

*September 2014 – July 2021*

- A Levels: Biology A\*, Chemistry A, Maths A, Physics A.
- GCSEs: Biology 9, Chemistry 9, Physics 9, English Language 9, English Literature 7, Geography 9, Economics 9, Music 8, French 8, Higher Project Qualification A\*.

## PROFESSIONAL EXPERIENCE

---

### **Data & AI Consultant, Kubrick Group, London**

*August 2025 – August 2026*

#### *Data Engineer, The AA (Client Engagement)*

- Designed and implemented production-ready data pipelines in Databricks using PySpark to onboard new third-party data sources, enabling integration ahead of deadlines.
- Developed PySpark transformation and join logic to standardise data formats and enrich anonymised datasets for downstream analytics and machine learning.
- Investigated pipeline failures using PySpark and SQL, tracing errors to data-quality issues including incompatible timestamp formats and implementing fixes to improve reliability.
- Supported the migration of repositories to Databricks Declarative Automation Bundles, helping standardise deployment workflows across the platform.
- Worked within a 3–5 person data engineering team, collaborating with data scientists and other engineers to deliver production data products using Git, Azure DevOps and Jira within an Agile environment.
- Used Microsoft Copilot and Codex to support development planning, debugging and code troubleshooting, validating suggested solutions before implementation.

#### *Professional Training & Projects*

- Built an end-to-end Databricks analytics solution as part of a team project, transforming relational and blob-storage data through Bronze, Silver and Gold layers for downstream reporting.
- Translated stakeholder requirements into interactive Power BI reporting, including performance KPIs, trend analysis and forecasting to support resource-allocation decisions.
- Databricks Certified Data Engineer Associate.

### **Undergraduate Researcher, MBiol Programme, University of Oxford**

*October 2024 – June 2025*

- Research areas: biochemistry, structural biology, bioinformatics, sustainability.
- Investigated protein structure and function using computational and experimental approaches to study the transcription factor NodD.
- Applied native mass spectrometry to analyse protein-ligand interactions and protein oligomerisation.

- Used AI-driven protein structure prediction (AlphaFold, Chai-1) and bioinformatics techniques to support structural analysis and biological interpretation.
- Interpreted experimental and computational data using R and bioinformatics tools, communicating findings through a dissertation and presentations.

#### **IP Intern, Agile IP (Remote)**

*July 2024 – August 2025*

- Analysed real-world IP cases to explore strategies for intellectual property protection and enforcement.
- Drafted patent claims and conducted prior-art analysis for real-world intellectual property cases.

#### **Data Analyst Intern, VANN (Remote)**

*June 2023 – July 2023*

- Produced reports on pharmaceutical spending trends to support business strategy and market analysis.
- Conducted research into acquisition of real-world patient data by pharmaceutical companies.

### **CAPABILITIES**

---

- **Programming & Analytics:** Python (Pandas, NumPy, scikit-learn), SQL, R, Power BI, Excel
- **Data Engineering:** PySpark, Databricks, Apache Spark, Delta Lake, Unity Catalog, ETL/ELT, data modelling, pipeline orchestration
- **Cloud & Development:** Microsoft Azure, Git, Azure DevOps, VS Code
- **Delivery:** Agile/Scrum, Jira, Confluence, stakeholder engagement

### **LEADERSHIP**

---

#### **Secretary, Oxford Bioengineering Society**

*October 2023 – June 2025*

- Organised a bioengineering symposium in Oxford with 100+ attendees and 7 speakers.
- Co-organised a national symposium at Stevenage Bioscience Catalyst, securing £7,000+ in ticket sales and sponsorship. Oversaw financial management, including ticket revenue, payments, and sponsorship.
- Secured guest speakers by networking with industry professionals.

#### **Graphic Designer & Social Media Officer, Oxford Tamil Society**

*October 2023 – June 2025*

- Designed and published social media content and promotional materials using Adobe Illustrator to establish society's branding.
- Collaborated with society members to plan and promote events, increasing engagement and participation through targeted social media strategies.

### **ADDITIONAL INTERESTS**

---

- **Graphic Design:** Created branding, logos and digital graphics for companies and societies using Adobe Illustrator, Photoshop and InDesign.
- **Web Development:** Built a personal portfolio website using HTML/CSS, JavaScript and Three.js, with 3D assets created in Blender and UI designs in Figma.
- **Guitar:** Achieved Grade 6 (Electric) from Rockschoool and Grade 5 (Classical) from Trinity College London and performed at several events.
